Creating Smiles

PRIVATE FEES

There are many advantages of private treatment here at the Suffolk Orthodontic Practice. Treatment is carried out using state of the art appliances most of which are not available for NHS patients. The treatment is carried out by experienced operators under the supervision of the orthodontist who is also the consultant at the local hospital. Additionally there is no restriction with availability of appointment times within the practice opening hours. The choice of interest free finance options also makes private orthodontic treatment now more affordable than ever and allows you to spread the cost of this treatment.

The price of your treatment is fully-inclusive and includes all your active treatment and one year's post-treatment follow-up. The cost also includes two sets of retainers for the retention phase. The cost will vary according to the complexity of your case but the below fees provide a guide to the starting price of each brace.

Damon Braces from £3400

Finance option includes a deposit of £340 followed by £170 a month for 18 months

Damon Clear Braces from £4000

Finance option includes a deposit of £490 followed by £195 a month for 18 months

Lingual braces from £8500

Finance option includes a deposit of £1030 followed by £415 a month for 18 months

Invisalign braces from £5000

Finance option includes a deposit of £860 followed by £230 a month for 18 months

A 10% discount is offered to those who are willing to pay the whole fee at the start of treatment. For this purpose the start of treatment is signified as when the consent form is signed and the appointment for the placement of the appliances is made.
